

BLUU OCEAN

BLUU OCEAN MEDICARE (P) Ltd.

About us

Bluu Ocean Medicare Pty Ltd is one of the very few integrated supply management companies with focus on advanced healthcare solutions.

We are a system integrator, reseller, exclusive channel partner and developer of innovative solutions and products. The key areas we are focused are on providing solution which is customized for each scenario with the help of innovative solution building through research, engineering and manufacturing of advance systems comprising of unparalleled sophisticated features.

The company primarily focuses on:

- 1- Blood transfusion safety
- 2- Mother & Child Healthcare
- 3- Better patient Management & Care

Our Core Deliverables are

- Innovative medical equipment's & Fixtures
- Hospital Supply & Services

Index

Keeping in view the advancement of better healthcare facility, we would like to present the following:

Healthcare Products	VienViewer	4
	HaemoVigil	5
	Timestrip	6
	Cool Tab	7
	Fetal Lite	8
	VapCare	9
	Saans	10
	Noxeno	11
	SinuCare	12

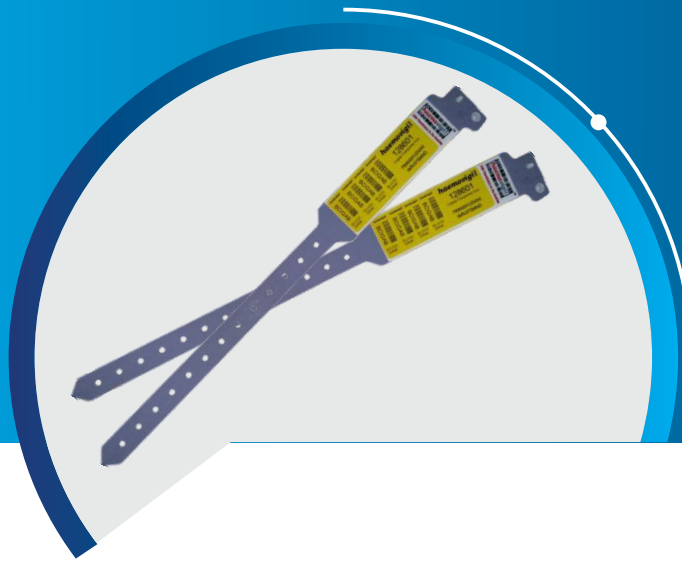

VeinViewer

A globally acclaimed patent device of Christie medical holdings, USA.

- Designed to visualize subcutaneous vasculature for IV access and blood drawn procedure.
- Best solution for the intravascular access
- Useful for enhancing PICC Placement
- Helps locating a possible adjunct to central line where ever possible.

Hameovigil

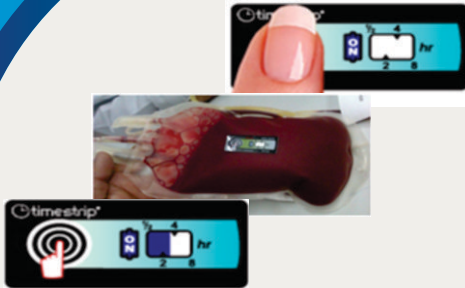

A revolutionary transfusion safety system that drastically minimizes bedside transfusion errors through human factors.

- A solution that minimizes patient identity
- An electronic barrier system which ensures pre-transfusion to patient ID
- Check of the patient's unique identification through lock access of blood component:
 - ▶ Will not open if the blood component is brought to the wrong patient
 - ▶ Ensures the blood bank does not release a wrong unit.
- Provides a way to audit the specimen –collection process
- Helps to detect wrong-blood-in tube errors.

Timestrip

Cold chain monitoring of Blood products, based on the micro-capillary technology.

- This technology is used to monitor transportation and transfusion of blood components within the appropriate time and temperature limits.
- Meant for use in whole blood/PRBC with a threshold temperature of 10 degrees.
- Helps in observing the time taken to complete the transfusion.

Cool Tab

Blood Bag Sorting & Labelling Table

- Maintains Cold Chain in the entire life cycle of the blood component.
- Helps in improving quality of blood component.
- Eases the work flow in the blood bank.
- Portability for movement of blood units from one area to another.

Fetal Lite

Next-gen fetal heart rate monitor, a compact, wearable and intelligent contraction stress test and non-stress test monitor.

- An easy, effective and comfortable monitoring of fetal and maternal parameters post 36 weeks of gestation and during labor.
- Second in world device that monitors fetal heart rate in women > 36 weeks using ECG Technology.
- Easier to use, portable and lower skill requirement from personnel.

VapCare

First in world automated secretion management and oral hygiene device for ICU Patients on ventilators.

- Vapcare automates the process, thus ensuring compliance to protocols and also improving efficiency of nurse time.
- Reduces risk of acquiring lung infections by providing consistent and effective secretion and oral hygiene management.
- Post intubation application, without interfering with the process of ventilation.
- Reduced mucosal injury.

Saans

A multi-powered Neonatal CPAP Device provides continuous breathing support in spontaneously breathing premature neonates.

- Provides the same therapeutic pressure as BCPAP systems.
- Provides passive humidification delivering a blended flow of oxygen and filtered air.
- Ensures adequate clinical care to infants in respiratory distress during transportation.
- Designed specifically to operate in low-resource and low-skill settings.

Noxeno

A simple and safe nasal foreign body extractor.

- An innovative and unique product to extract any problematic item from nasal of a patient.
- Extremely useful for small children with no harm to any part of organ.

SinuCure

India's first affordable balloon sinuplasty system, affordable treatment of chronic Rhinosinusitis.

- The device can be used by a trained ENT in a day-care procedure under local or general anesthesia or as a hybrid procedure with Fess.
